

NCC-921 風水設計 備註範本

風水設計提供「備註及經歷預設範本」功能，使用者可將常規的範本設定在風水參數內，以後只要新增風水資料，即可直接套用預設的範本。

The image shows a screenshot of the 'Feng Shui Design' software interface. The main window is titled '風水參數' (Feng Shui Parameters) and contains various parameter settings. A red box highlights the '風水參數' (Feng Shui Parameters) option in the left sidebar. A red arrow points from this box to the '風水參數' (Feng Shui Parameters) window. A yellow callout bubble next to this window contains the text: '由風水參數〔範本〕頁次內將備註／經歷範本預先設定好。' (Set the remarks/experience template in advance in the page of the Feng Shui Parameters [Template]).

The '風水參數' window has a tabbed interface with '範本' (Template) selected. The '備註範本' (Remarks Template) tab is active, showing a table with the following content:

外局			
來水			
去水			

Below the table are buttons for '匯出' (Export) and '匯入' (Import), and '確定' (OK), '取消' (Cancel), and '預設值' (Default) buttons.

The '住宅資料內容' (Residence Data Content) window is also visible, showing a compass rose and input fields for '山' (Mountain) and '角度' (Angle). A red box highlights the '備註' (Remarks) tab in the '住宅資料內容' window. A red arrow points from this box to the '備註範本' dialog box. A yellow callout bubble next to this dialog box contains the text: '以後只要新增風水資料，即可看到預先設定的範本。' (After adding Feng Shui data, you can see the pre-set template.)
